

**Ph.D. COURSE ON
"Strategic behaviour in fisheries:
Applied coalition game modelling"**

**University of Helsinki, Helsinki, Finland, 6-10 September 2010
Nordic Marine Academy and
Centre for Fisheries & Aquaculture Management & Economics**

GUEST LECTURES

Marko Lindroos, University of Helsinki, Finland
Veijo Kaitala, University of Helsinki, Finland
Pedro Pintassilgo, University of Algarve, Portugal
Lone Kronbak, University of Southern Denmark, Denmark

DESCRIPTION

The aim of the course is to explore the advances and recent methods of coalition games applied to economics of fisheries management. The course begins by introducing the students to the essence of game theory and why and how it should be applied to fisheries and fisheries economics. This is done in a series of theoretical lectures. A second part of the course aims at giving an overview of the existing applications. The last part of the course provides the students with some basic knowledge and hands on experience with game-theoretic modelling by using the Matlab software. More information and a preliminary course outline is available on the course web-site.

Participation

There is no course fee for participating in the course.
All other costs are to be paid by the participants (travel, accommodation, lunch and coffee breaks).
For students studying in [NMA member institutes](#) the travel and accommodation will be covered.

To apply to the course, please send the following information to Marko Lindroos
(marko.lindroos@helsinki.fi) by e-mail:

- ✓ Application letter (including previous studies in economics, game theory and fisheries)
- ✓ CV
- ✓ Recommendation letter from supervisor
- ✓ Note about NMA member institute

Deadline for applications is April 15th. Notification of acceptance will be sent by May 4th.

News and questions

More information about the course can be found at the FAME website (www.sdu.dk/fame) under courses and on the course web-site:
